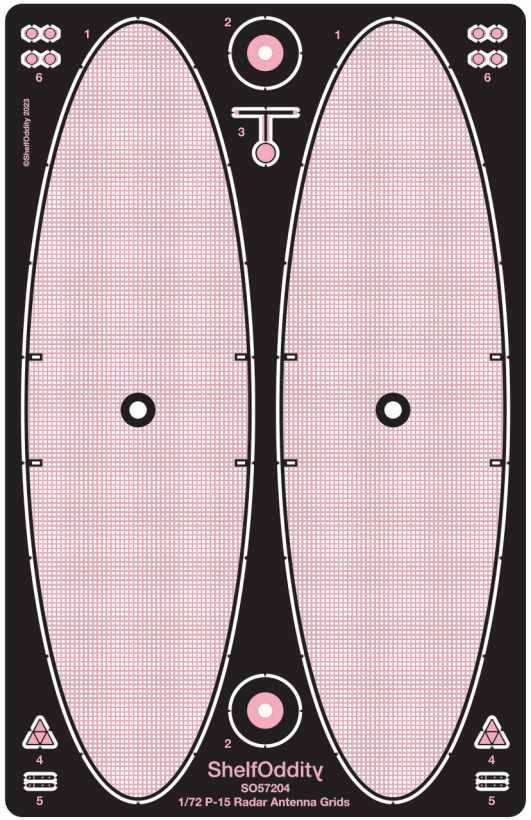
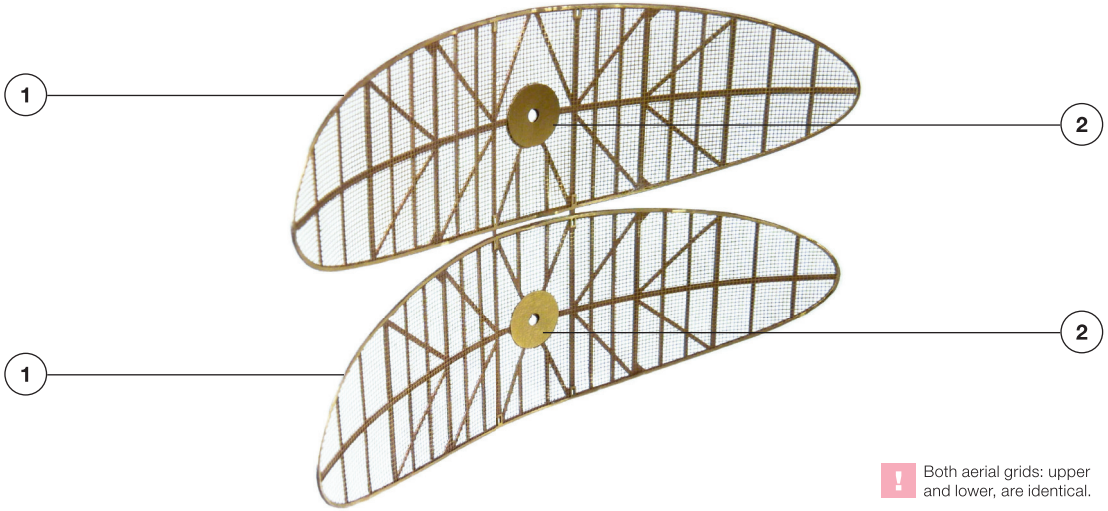
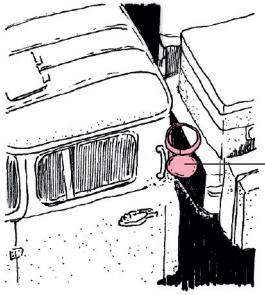
SO57204
1/72 P-15 Radar Antenna Grids for ZZ Exclusive Modell kit

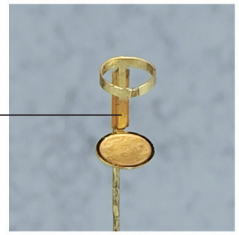
Shelf Oddity

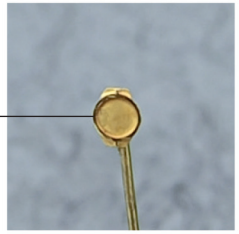


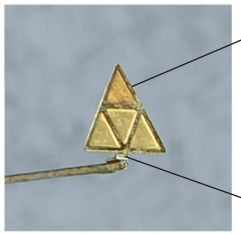


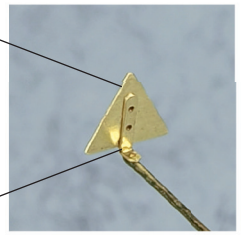
! Both aerial grids: upper and lower, are identical.











This photo-etched detail set is designed as an update to ZZ Modell 72006 P-15 Radar multimedia kit.

This set contains one representation of antenna grid plus two versions of retro-reflectors used throughout Eastern Europe (see our SO5722 manual) and the standard Soviet fire extinguisher rack. Use your references for their placement.

Please note that antenna grids parts are very fragile and need to be treated with the utmost care.
