

SO2144043

1/144 Yak-3 for Sputnik Labs kit

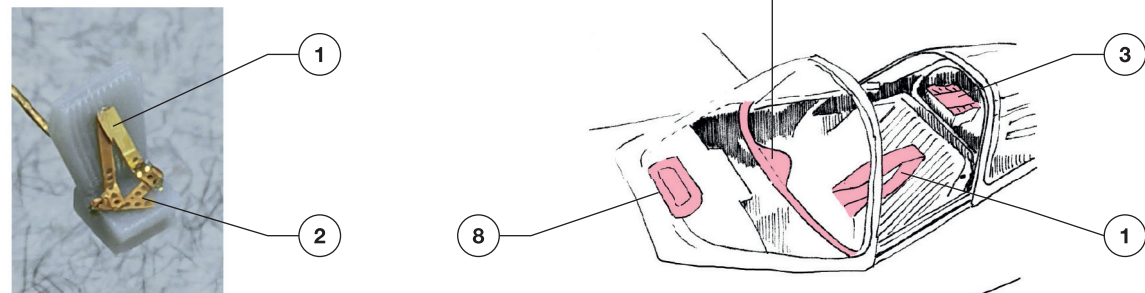

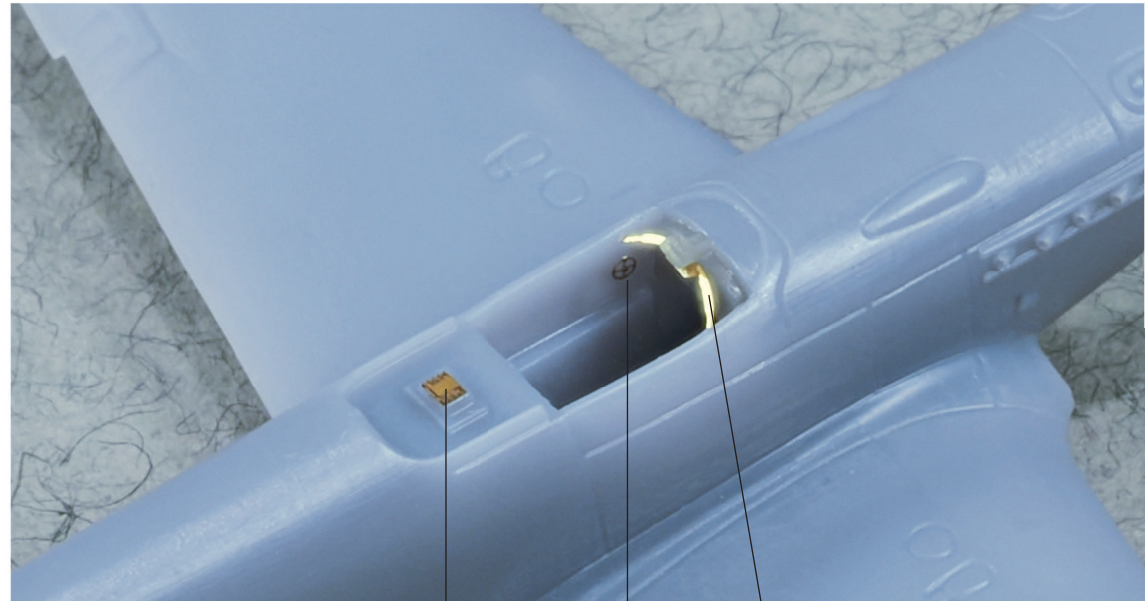

Shelf
Oddity

This photo-etched detail set is designed as an update for the delicate and detailed 3D-printed Sputnik Labs kit. A few external as well as internal details which have been omitted in this kit are included in our set.

As we are not very keen on hyper-detailing of the interior of 1/144 scale kits we have prepared the most prominently visible cockpit details only. Starting with the quite obvious pilot harness (1 & 2) we have continued with the top cover of radio apparatus (3), gun-sight support (4) and concluded with a set of hand wheels (5) visible on the upper part of both sides of cockpit tub.

The cockpit front air scoop (8) was present on the bottom part of the windscreen.

1/144 Yak-3 for Sputnik Labs kit

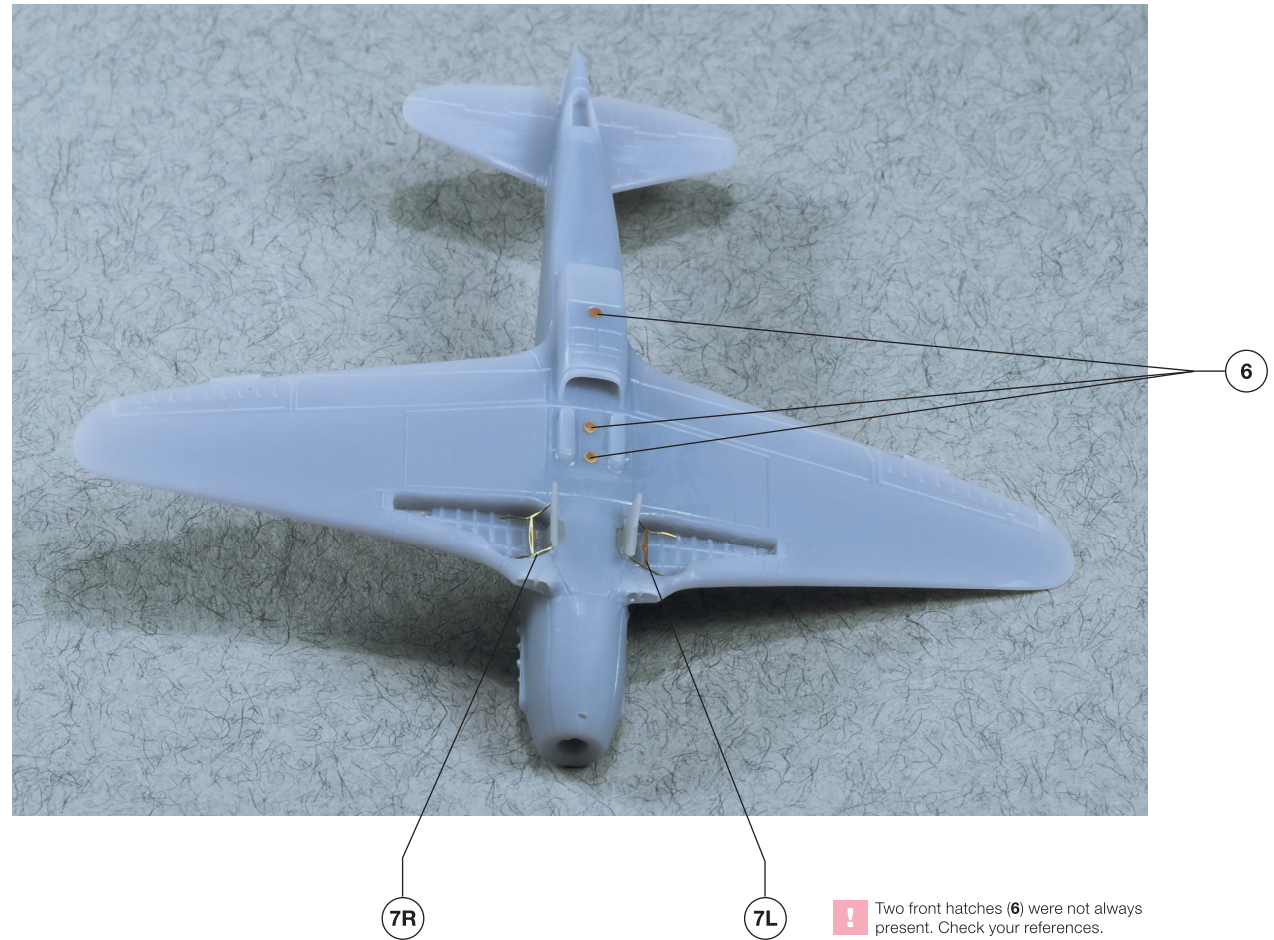

Shelf
Oddity

The most prominent external detail included in this set are inner gear doors actuators (**7L** & **7R**). As these parts are very thin and delicate approach their attachment with the utmost care.

The remaining parts are circular hatches (**6**) sometimes present on the bottom part of the wing centre section and on the bottom of the engine cooler – check your references here as layout and quantity of those hatches differed between various Yak-3 production runs.
