

If the SO314427 set was not boring enough - we present three more F-15Es that are as plain as Strike Eagle can be.

Let me copy the Vulgaris part from Vol. 1 here: Vulgaris. Not vulgar. Vulgaris: ordinary, common, derived from the masses.

At the time we are writing this - 2018/9 - it is/was difficult to finish a 1/144th scale F-15E model in anything else than special paint scheme.

Which is rather annoying. Especially when there is so many interesting things happening among the uniform masses of Strike Eagles. As the years go by the mighty Eagles are used and abused, often visiting places such as airshows, Mach Loop, Axalp and get to be heavily photographed in the process. And those are regular F-15Es, not the special anniversary parrots.

As it has become our habit - we strongly encourage to collect photographic evidence to support your particular case, because even on the plainest of plain F-15E there are many things happening. Color variation between aluminum skin and dielectric covers can be considerable. Refueling receptacle door gets scratched. Control surfaces get replaced with mismatched parts. Fluids spill and attract dust to some areas.

Where to begin?

How about random, let's say **90-0241**

F-15E-49-MC

C/N 1173/E143

391st FS, 366th FW Mountain Home AFB

Aircraft S/N decal for front gear door (13)

Notes:

1. If you wish to print this instructions be sure to select "Actual Size" in print options - this will result in true 1/144 scale drawings.

2. For stencils refer to our set
