SO70002

I/700 IJN Kirishima Main Deck Set
for Fujimi Injection Kit

Shelf
Oddity

Designed by Blacman

General Remarks:

Set has been designed in 0,02mm accuracy. Etching process may decrease some dimensions and create irregularities. To obtain best results gluing "edge-to-edge" is highly recommended. Assembling irregularities & unapriorities might cause incremental missplacement in further level build.

Set is intended to be replacement or complement for standard injection parts from Fujimi set. During reading this manual you might see some generic photoetched or plastic parts which are not a subject of this set.

As for 1942.
