C

IJN 11m & 9m Motor Boat

SO70014

1/700 IJN Ultra Fine Railings Set
for Fujimi Injection Kit

Shelf
Oddity

Designed by Blacman

General Remarks:

Set has been designed in 0,02mm accuracy on extremely thin brass. Etching process may decrease some dimensions and create irregularities. To obtain best results gluing "edge-to-edge" is highly recommended. Be careful when bend and correct bendings. Set contains tailored parts for new Fujimi injections widely used in latest Fujimi 1/700 ship models

Set is intended to be replacement or complement for standard injection parts from Fujimi set. During reading this manual you might see some generic photoetched, brass tubes or plastic parts which are not a subject of this set.
