

SO5721

1/72 IJN 7.7 mm MG type 92 aiming devices generic set

Shelf
Oddity

This photo-etched detail set is designed as an upgrade to various IJN airplanes fitted with 7.7 mm Machine Guns Type 92 (Lewis).

This set contains enough parts to cater up to ten machine guns. The front aiming piece is supplied in two varieties – standard (2) with even thickness of 0.1 mm throughout and ultra fine (3) with the reduced thickness of aiming pin – 0.05 mm.

Please note that ultra fine parts are much more fragile and therefore a bit harder to position properly.
